Election/Restrictions

Newly submitted claim 25 directed to an invention that is independent or distinct from the invention originally claimed for the following reasons:

Invention as originally claim and the newly submitted claim 25 are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed is usable in devices other than an cable laying vehicle. The subcombination has separate utility such as in a winching of self-propelled vehicles.

The examiner has required restriction between combination and subcombination inventions. Where applicant elects a subcombination, and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution

Art Unit: 3654

on the merits. Accordingly, claim 25 withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows: Claim 25 has been cancelled.

Allowable Subject Matter

Claims 20-24 are allowed.

The following is an examiner's statement of reasons for allowance: Claim 1 is allowable because the teachings of the prior art taken as a whole do not show or render obvious the combination set forth, including: a removable module located behind the drives cab and a rolling ring drive that a person having ordinary skill in the art would understand as comprising "a plurality of rolling ring bearings telescoping a threadless shaft" (Remarks 3/31/08 at 7), and having a pitch control for setting the length of travel of the rolling ring drive along the rotatable shaft per rotation of the shaft.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for

Art Unit: 3654

Allowance.”
